Key Knowledge

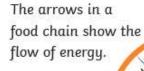

The teeth of an animal are designed to eat different foods depending on the diet of the animal. Examples of a herbivore, a carnivore and an omnivore skull:

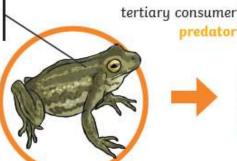

consumer

Year 4

| Key Vocabulary | |
|----------------|---|
| herbivore | An animal that eats plants. |
| carnivore | An animal that feeds on other animals. |
| omnivore | An animal that eats plants and animals. |
| producer | An organism, such as a plant, that produces its own food. |
| predator | An animal that hunts and eats other animals. |
| prey | An animal that gets hunted and eaten by another animal. |

To help prevent tooth decay:

- limit sugary food and drink;
- brush teeth at least twice daily using a fluoride toothpaste;
- visit your dentist regularly.
